

# North Falkland Basin Plays

- Good quality sands
- Thinner, poor quality sands
- Poor quality sands/volcanics

The Liz Fan is located at the base of the source rock interval and the sand is derived from the west. Liz encountered gas and condensate in the deeper syn-rift sequence. The Rachel Fans are inter-bedded with the source rock and occur at multiple levels. The Rachel Fans are part of the East Flank Play fairway and are sourced from the east.
